Hiring Manager
MC Consultants, Inc.
Altamonte Springs, FL

Dear Hiring Manager,

I am writing to express my interest in the IT Operations Manager position at MC Consultants. With over seventeen years of experience designing and managing enterprise IT infrastructure and my current pursuit of a Bachelor of Science in Computer Science at the University of Central Florida, I bring both extensive hands-on technical expertise and a commitment to continued professional development.

Throughout my career as an IT Manager at Sirgon Corporation, I have been responsible for designing, deploying, and maintaining enterprise infrastructure environments. My work has included implementing Windows Server systems, managing Active Directory environments, designing secure network architectures, and maintaining reliable infrastructure through redundancy and failover strategies. These experiences have allowed me to develop a strong foundation in infrastructure management, network security, and system reliability.

In addition to my professional experience, I actively pursue technical development through personal projects and academic coursework. I recently designed and developed an AI Assistant Control Panel that integrates language models with executable system tasks using React and FastAPI. I also maintain a home lab environment using Proxmox virtualization to test infrastructure configurations, disaster recovery processes, and system automation techniques.

I would welcome the opportunity to bring my technical background, leadership experience, and passion for infrastructure design to MC Consultants. Thank you for your time and consideration. I look forward to the opportunity to discuss how my experience and skills align with your team's needs.

Sincerely,

Fernando Antonio Fonteles Oliveira
